Problem

COVID 19 has forced Arena's and large Venues to close indefinitely due potential spread of the virus. This Pandemic has caused a major disruption in all Sporting and entertainment events. Thousands of people have lost their jobs due to closure of the arena and surrounding entertainment venues.

Solution

We are excited to launch the first interactive mobile app that allow fans to virtually support their favorite teams Professional, Collegiate, High School, and Club Tournaments. With our mobile platform, fans can talk into mobile devices this is message is then pushed to Arenas across the world and played real-time. Never again will fans ever have to worry about not being heard.
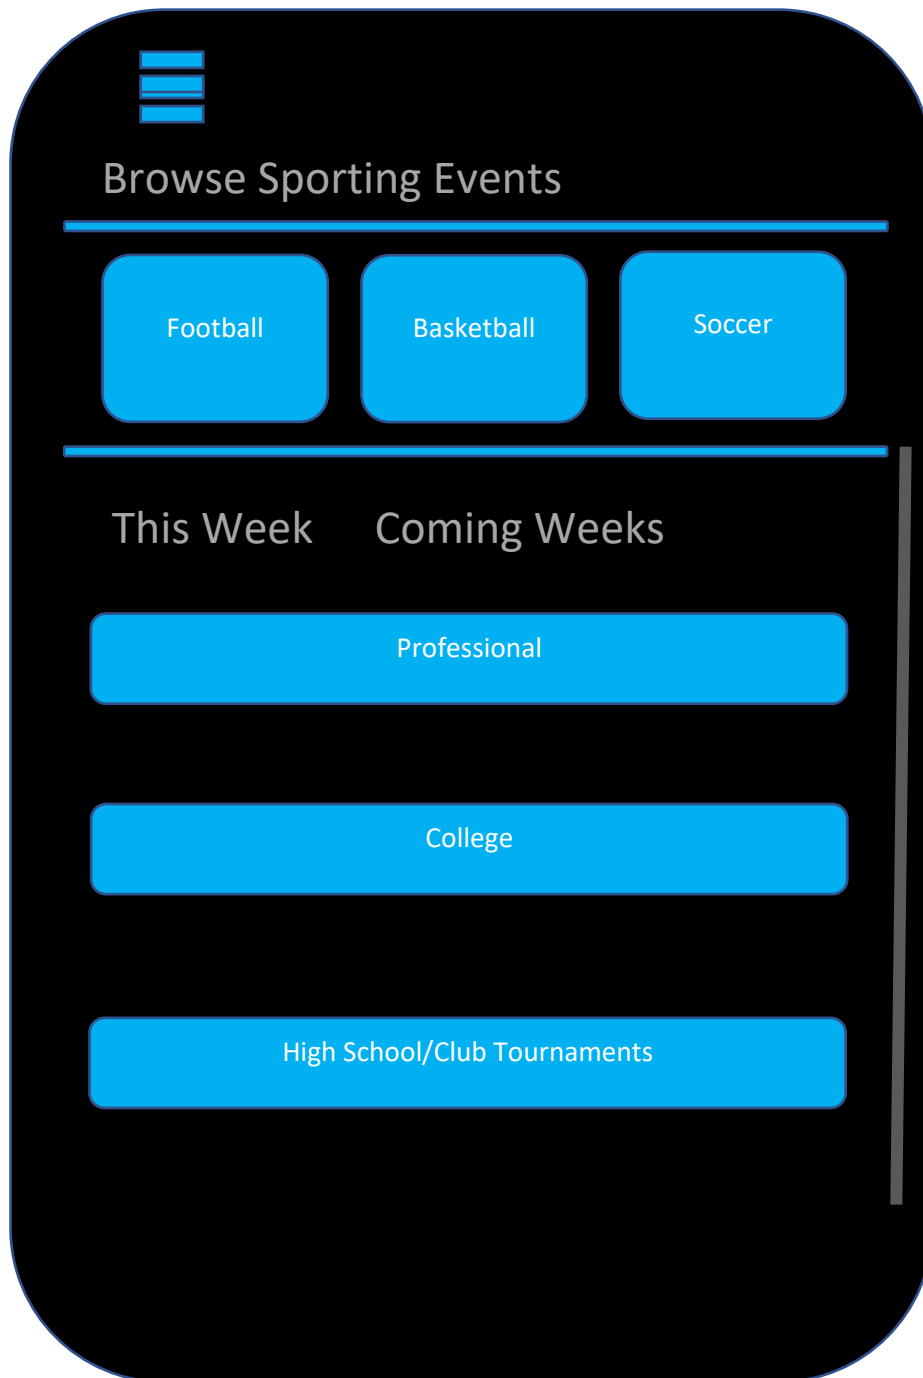

Interactive Features:

> **In Game Group Chat:**
> **Direct Arena Message options:**
> - Direct Voice Capture
> - Simulated Clapping
> - Drums
> - World Cup Horns

Underlying Process

We configure speakers, audio servers, and broadcast networks for arenas. We then make this readily available to our ghostfanz mobile app user community. They are then able to select there preferred interaction on the platform.
